$2 Per Year

Amos H. Funk Is President Of State SCD

Amos H. Funk, chairman of the Lancaster County Soil Conservation District for the past 10 years, has been elected president of the Pennsylvania Soil Conservation District Directors

Funk, who succeeds Charles Gillette of Townville, Crawford County, was installed last week at the annual meeting of soil conservation district directors in Reading

A former pesident of the Pennsylvania Vegetable Growers Association for five years and pesident of the Conestoga Valley Association, a watershed improvement group, for five years, Funk has served as first vice president of the state soil conservation group for the past year.

Speakers at the 60-district meeting emphasized the importance of cooperation between rural and urban dwellers in accomplishing the whole job of conservation.

Changes in land use caused by population increase and shifts will bring about new programs of soil and water conservation, the state delegates agreed. Programs must be adapted to serve a wider variety of land users.

David G Unger, executive secretary of the Pennsylvania Soil Conservation Commission, urged the transformation of soil conservation districts into natural resource districts that could help coordinate all resource programs at the local level.

Farm Calendar

Oct. 29 — 6 p.m — Elizabethtown Kiwanis club to honor Elizabethtown area 4-H club members at their regular meeting in Aunt Sally's Kitchen.

Oct. 30 — 11:30 a.m. — Ground Breaking Ceremonies for New Office and laboratory building of the Pennsylvania Department of Agriculture opposite the Farm Show Arena, Harrisburg.

10 a m, — 4-H capon club roundup in the Hotel Brunswick, Lancaster.

7 p m. — 4-H capon club roundup at the New Holland American Legion Home.

Nov. 1 — 7 30 p m — Interstate local meeting at the Lafayette fire hall Lincoln Highway, east of Lancaster.

8 p m. — Senior Extension club meeting at the Franklin and Marshall College museum.

8 p m — Southern 4-H electric club meets in the Little Britain Elementary School.

Nov. 2 — 7 p m — Annual banquet of the Lancaster County Guernsey Breeders

Twenty Seven County Showmen Enter 78 Head In Stock Show

Twenty-seven showmen from Lancaster County will exhibit 78 head of livestock in the sixth annual Pennsylvania livestock Exposition which begins November 5

According to a report from Ben Morgan, general superintendent of the show, of the 22 states represented in the entry lists, Pennsylvania leads with 1,396 animals out of a grand total of 3,126 head.

Keystone State exhibitors, totaling an even 200, come from 35 counties They will show 364 head of beef cattle, including breeding stock in the four principal breeds — Angus, Hereford, Polled Hereford and Shorthorn, feeder steers, carcass steers, open class market steers and 4-H and FFA baby beeves

Host state swine exhibitors will include 354 head of brood stock in seven breeds — Berkshire, Chester White, Duroc, Hampshire, Poland China, Spotted Poland China and Yorkshire Swine entries from this state will include also 260 market barrows and 89 carcass barrows.

Pennsylvania sheepmen will show 379 head. These include carcass and market wethers and brood stock entries in nine breeds — Cheviot, Corriedale, Oxford, Dorset, Rambouillet, Hampshire, Southdown, and Suffolk and Shropshire

Egg Cooperative Signs Lease For Unused Plant

Producers Cooperative Exchange with headquarters in Coatesville this week announced signing a lease for the balance of the idle Poultry dressing plant facilities.

The plant, idle since the cessation of poultry dressing operations last fall, has been leased to the Dairy Sales Corporation for an undisclosed price

The firm plans to begin using the facilities for a butter processing plant about the first of the year, according to officials of the exchange

Officials also announced that the board of directors has authorized rental of more efficient egg sizing and packaging equipment which will include an electronic blood spot detector and "scanner", better

Farmers Invited To Help Harvest Co. Corn Plots

The well known and widely acclaimed Lancaster County Corn Variety plots will be harvested next week and yields checked

Farmers and seedsmen are invited to come to either or both of the two plots next Tuesday Ocober 30, to assist with the harvesting and yield checking according to Arnie Lueck, assistant county agent.

Mary Jane Herr Wins Trip To Club Congress

Turning a flair for entertainment into a recreation project has won a state award and an expense-paid trip to Chicago for Mary Jane Herr of Refton.

Mary Jane will be among twenty four 4-H club members from the state who have been selected to represent Pennsylvania at the 41st National 4-H Club Congress in Chicago, Nov 24 to 29

Starting her club work eight years ago with a steer, Mary Jane has won some 14 trophies in county, district and state competition with her beef projects She has won ribbons in strawberry and capon project competition, clothing construction and food preparation, in addition to holding most of the offices in her local community club and the county beef club.

"My first great thrill in 4-H work came in my second year in the beef club" Mary Jane says In that year, 1955, she showed the champion Hereford of the district show, and went on to show the calf to reserve champion and win the showmanship trophy for herself.

Perhaps the thrill was greater because Mary Jane beat out her brother Donald, who had been in club work for six years This keen competition between brother and sister seems to have been one of the spurs to success for both.

Donald is now in his final year at the Cornell School of Veterinary Medicine, and Mary Jane has recently graduated

Livestock Men Hope For Scabies-Free Rate For Pa.

Pennsylvania Department of Agriculture officials hope to see the state officially declared "Scabies Free" by the first of the year, a US Department of Agriculture Veterinarian told stock yards men and farmers Wednesday.

At the fourth meeting between members of the Lancaster Livestock Exchange and local livestock farmers, sponsored by the exchange as part of the National Terminal Livestock Markets month celebration, Dr George L Smith, USDA veterinarian assigned to the Lancaster Stock Yards, said officials hope the state will be declared Scabies free after completion of the second round of treatment for the disease this fall.

Smith said second round inspections and dipping treatment of sheep flocks in the state are beginning now that weather has begun to get cooler and the certification should be forthcoming about January first. If the state is not declared scabies free, a third round would then be planned

He said that Pennsylvania was "in a bad way" concerning the shipping of sheep to other states before the eradication program was instituted earlier this year. The eradication program, he said, is part of the federal government's program of standardizing livestock health regulations.

Smith said he sees the role of the terminal livestock market increasing in importance in the event of a national emergency

In each terminal livestock market a radioactivity mon-

FIVE-DAY WEATHER FORECAST

Temperatures during the next five days are expected to average seven or more degrees below the normal range of 41 at night to 60 in the afternoon. Cold temperatures during Saturday and Sunday are expected to give way to more moderate readings on Monday. Tuesday will be cooler again followed by a warming trend Wednesday. Precipitation will probably be less than 0.1 inch falling as light rain Monday and again late Wednesday.

LANCASTER POULTRY CENTER

Broilers Continue Gain

Broiler prices at the Lancaster Poultry Center moved up more than a cent and a half during the week. A total of 122,000 head of broilers in 19 lots crossed the block at prices ranging from 17.6 to 18.1 for a sale average of 17.-94. The sale average last week stood at 16 36.

Two lots sold at the top figure. Jack Bucher had 3,-600 White Vantress at nine weeks and two days purchased by Carl B. Risser The other lot, 1,000 White Vantress at nine weeks was consigned by Donald Frank and bought by Martin M Brendle.

Four lots of roasters brought 24.3 to 25 for the 2,575 head, while 4,600 pullets in two lots brought 23 to 23 9. One lot of 350 leghorn fowl brought 9.2 and two lots of heavy fowl sold for 15 8 and 16.1 for the 1,250 head

The complete October 25 auction offered and sold 130,-935 head in 28 lots. All lots on offer were sold.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price.

● Delmarva

Fair Demand; Price Rises

Live broiler prices in Delmarva advanced sharply to more than a half cent higher during the 24 hour period ending 10 30 Friday morning. A very good demand took the light offerings.

Ready to cook demand continued spotty and unaggressive ranging from slow to barely active.

With practically no plants on the Eastern Shore operating on Saturday, estimated slaughter in Delmarva was 623,000 head compared to the 699,000 head last week end.

Delmarva reported prices of 16 8 to 18 at farms for 813,-000 head including 426,700 head sold at the Eastern Shore Poultry Producers Exchange, Selbyville, Del.

The Delmarva broiler-feed ratio for the week ending October 19 was up three points from the previous week at 3.6. Broilers averaged 16 84 during the week and mash cost the grower $93 23 per ton The ratio for the comparable week a year ago was 3 8 when broilers averaged 16.56 and mash cost the grower $86.72 per ton.

From Where We Stand . . .

What Is The Worth Of Confidence

What is the worth of confidence?

How much is it worth to have confidence in your country, in your elected officials, in the producers and processors of the food you eat.

Immediately you will answer that it is of utmost importance to have faith that the country is strong and that she is right a good portion of the time You will say that trust in elected officials is a necessity, or the officials should be replaced.

But have you ever had any thoughts about the producers and processors of the food you eat

Secretary of Agriculture, Orville Freeman, said recently in a speech in California, "On the plane, as I was traveling from New Orleans to Los Angeles, it occurred to me that those air passengers who ordered milk did so without the slightest concern as to whether it was put on the plane in New Orleans or at some other place.

"Whether it was produced in the South, West, North or East — they cared not I doubt if one passenger in the several dozen even read the brand name on the carton

"You might say that air passengers must have confidence in the air line that flies them and feeds them, but the fact is that this confidence extends to all American travelers No matter how they travel or at what obscure crossroads they find themselves — they can and do buy dairy products without the slightest worry

"The housewife opening a bottle of milk or a package of cheese or butter anywhere assumes that the product will be wholesome, safe and of top quality This is true even though no food is more perishable — and none is easier to contaminate."

It is true Anywhere in the United States a housewife can pick up dairy products with confidence — a confidence built on a continuing supply of pure products in the past.

If the dairy industry is to continue to merit the confidence of the American housewife, it is up to each and every dairyman to help maintain that supply of pure products

We have said before, and we believe it bears repeating, health requirements have done more for the dairyman than any other one thing in building the confidence of consumers

It is true there are those dairymen who would produce milk of the highest quality even if they are not forced to, but there are always those others who would destroy the buyer's confidence by putting on the market a product of inferior quality.

If you, as a dairyman, would like to complain about health requirements, we believe you should complain that the health code is not inclusive enough, that it does not put stringent enough restrictions on milk moving from one area to another We believe dairymen are hurting no one but themselves when they complain that health laws are too strict

At least that's how it looks from where we stand

Stacks Of Letters

"I suppose you get loads of letters every week," she said "I read the editorials every week, and often think about writing a letter, but you probably get so many — "

We have heard this or a similar statement so often that we get the feeling there must be hundreds of frustrated letter writers around the county.

We do get letters, but not loads of them We, as do most editors, wish we could hear from readers more often. One of the most common concerns among writers is, "Is anybody reading the stuff?"

Sometimes we begin to be concerned, but then we remember the many times we, too, had an urge to write an editor when we agreed or disagreed strongly with something in the paper Usually we just put it off until the urge died, and forgot all about letter writing again until another editorial "got to us"

So when we remember that we are not so instant with the letters to other editors, we know why so few come across our desk

To you, we issue an invitation Whenever you agree, or disagree with the theme of an editorial, or whenever you particularly like or dislike a news story, or whenever you think of something that could in any way improve the service of this newspaper to its readers, drop a line to the editor. We assure you, all letters are carefully read and gratefully received whether they contain a boquet or a brickbat.

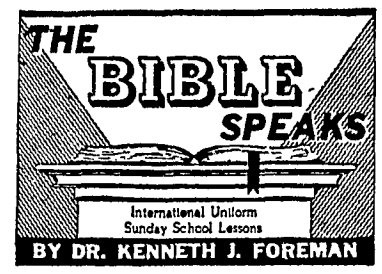
At least that's how it looks from where we stand.

BUTTERING UP THE IRISH

The average Irishman eats 45 lbs. of butter annually — the U S per capita use is down to 7 4 pounds A recent Harvard University study of Irishmen indicated they weigh less, had one-half as many cases of high blood pressure, and lower cholesterol counts than blood brothers in Boston

SAFFLOWER NOT THAT GOOD

Some 60 cases of "safflower shortening" were seized by Food and Drug Administration in late August on charges of false health and diet claims FDA charged the promotional literature falsely represented that the product is adequate and effective to prevent atherosclerosis, heart attacks, strokes; to control the blood cholesterol; to reduce body weight; to stay fit and active, and to improve health and vitality.



Bible Material: John 14:16-17, 25-26; 16 4-15; Acts 2, 4.7-10, 13; Romans 8.1-27.

God Within

Lesson for October 28, 1962

SOMETIMES it looks as if the Church made it harder instead of easier to believe in God. The church talks about the Trinity, but we don't understand that.

Dr. Foreman

It talks about the Holy Spirit, but that seems very hard to understand. On the contrary, the Church's teaching about the Holy Spirit (all the good of which we owe to the Bible in the first place) makes God much nearer than we would otherwise dare to think about Him. In fact, a definition of the Holy Spirit which many Christian teachers have expressed is just this: **The Holy Spirit is God at work in the hearts of men.** The Holy Spirit is God-within. You will never be any closer to God nor He to you, than you are to the Holy Spirit.

He will send . . . I will send . . .

Of course no reader will suppose that he can find out all there is to know about God, in one single column in a newspaper. God cannot be shut up in a million books, and of course not in a few lines of print. The Bible material for this week's study gives much more than we can deal with in so short a space. All we can do is to point out three truths, all of them from the teaching of Jesus. First of all is that apparent contradiction: Jesus tells His disciples first that the Father will send them the Holy Spirit, and then that He (Christ) will do so. We are intended to put these two truths together. The Holy Spirit comes from the Father and comes from the Son of God, from Jesus Christ. Now if you insist on puzzles, there are puzzles in that simple statement. But let's bypass the puzzles, and look at what is plain. The least this can mean is that the Holy Spirit is like the Father and like the Son, — we might (using human terms of course) say that the Holy Spirit is in harmony with, and represents, both the Father and the Son, both the high God and our Lord Jesus. (One is no more and no less God than the other is.) Well, what is this? Another puzzle? No; this truth gives us a way to distinguish between alleged Spirits of God and the true Spirit. If the "Spirit" leads a man to do what is not Christ-like, then we may be sure that whatever he has in his heart, it is not the Spirit whom Christ has sent.

Truth and Conscience

Jesus furthermore calls the Holy Spirit the "Spirit of Truth." Some Christians understand this to mean that wherever men are moving in the direction of truth —any truth, scientific, economic, intellectual, religious—there the Holy Spirit is at work. Now of course, if God is a god of truth, his Spirit will never support a lie. And we may well believe that God is concerned with truth of every kind and in every aspect of life. But it is also true that the Holy Spirit is most especially concerned with truth about God and about his relation to the world and particularly to man. It is quite possible, it happens every day, that men who have no religion and do not believe in God at all, make scientific explorations and discoveries that are true and even valuable. But no one is likely to learn much about God who does not seek the help of the Holy Spirit. To put this another way, only God can introduce us to God.

What a normal human being wants, however, is not mere bare truth, he wants not only to know, he wants to do. This is particularly true in the Christian religion. Like its mother-religion of Judaism, Christianity has always been interested in action. Right living is quite as important as right thinking, the two cannot be separated. So the Holy Spirit is called the "Counselor." This is a better translation than "Comforter" or "Advocate" though it may include those other meanings. The word suggests that God-within is not a presence only, but a guiding presence. Put into simple language, this means that the more Godlike, the more Christlike, a person is, the more he will do what is right in the sight of God. We can't live with people without learning their ways; and we cannot live with God without learning—humbly but truly—more and more of His will.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U S A Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Control Winter-Time Weeds

Modern weed control methods include the spraying in late fall or early winter for the control of such weeds as winter-cress, shepherd's purse, ground ivy, and chickweed Most of these weeds are found in grass-legume stands and will choke out the legume and reduce the quality of the forage crop MCP is recommended for the winter-cress after a killing frost, and either a dinitro spray or chloro IPC should be used on the others

To Utilize Corn Silage

Many acres of corn have been made into silage this fall, the delay of a killing frost is permitting many additional acres of late-planted corn to reach silage stage, if not maturity All livestock men should recognize the greater amount of feed nutrients from an acre of corn by making it into silage rather than by picking for grain For either dairy or beef cattle feeding corn silage has a definite place in an economical feeding program.

To Compost Those Leaves

All farmers and property owners can use a well-rotted compost pile each summer Rather than burn the leaves or have them hauled away it is suggested that they be mixed with topsoil, lime, and a complete fertilizer this fall and allowed to rot down into a compost by next summer This pile of organic matter is very useful for flower or vegetable gardens or around foundation shrubbery plantings.

To Get Farm Machinery Under Cover

When field work is completed this fall all pieces of machinery should be cleaned, greased, and put under cover against weather elements. Rust is one of the greatest enemies of farm machinery and reduces the life-span of usefulness All farmers are urged to protect their investment by keeping their farm machinery dry at all times.

Sow Fresh Seeds

Sow columbine pansy poppy and delphinium while they are fresh reminds A J Gianfagna, Penn State extension floriculturist Use flats or seed pans Provide adequate drainage and fill with well-prepared garden soil

DON'T COME A STEP CLOSER, this long horned mother seems to be telling that guy with the black box The horns are not only long, but sharp as well, and the cow let it be known she would not hesitate to use them if anything threatened her calf. These are three head of Scotch highland cattle on exhibit this week at the Lancaster Stock Yards. On display also are a Brahman Bull and a Scotch Highland steer with a six-foot horn spread. L. F. Photo.

I JUST WASHED MY HAIR AND I CAN'T DO A THING WITH IT. This five year old Scotch Highlander Steer has been on exhibition this week along with a 7 year old Brahman bull The exhibits are part of the Stock Yards celebration of National Livestock Terminal Market month. The 1425 pound steer was consigned by Robert Simon and was placed on exhibit by Lester Beam and Elias Diller.

itoring station is set up These stations take samples from the air as well as from the coats of cattle shipped to the yards. Smith is also rural coordinator of the Civil Defense program in the county

Speaking on behalf of the farmers in the group, Edward E Rishel, York, said he markets all his cattle through the Lancaster yards because he feels the market is good on heavy cattle, but he buys most of his feeder cattle privately or at the organized beef-breeder calf sales in Virgina

Rishel said he believed he could get higher quality feeder calves at the sales than on the yards

He said his only "gripe' about the Stock yards concerned the cost of selling cattle through the commission man, but he said 'I don't expect

County Riders To Compete In State Show

Six members of the Lancaster County 4-H light horse and pony club will be among the two hundred and thirty-two Pennsylvania boys and girls, all skillful and graceful riders, who today were named to perform in a 2-day horse show at the sixth Pennsylvania Livestock Exposition, Nov 5-9 in the State Farm Show Building.

Lester A. Burdette, of Penn State University, chairman of the horse show, said they will compete in 21 different events, starting Thursday night, Nov. 8, and finishing the following day They will be judged by Bradley Bailey, Hilliards, Ohio and J C Tischinger, Cockeysville, Md

Lancaster County equestrians include Barbara and Michael Shoemaker and Gerald S Wagner, Quarryville, RD 2, Fred Shaub, Quarryville, RD 1, Anna Mary Binkley, Quarryville, RD 3, Harold C. Groff, Manheim, RD 2.

● Corn Plots

(From Page 1)

The first of the two plots to be harvested is located on the Harold Rohrer farm opposite the Lampeter High School. Husking will begin in that plot at 9 a m.

At the Paul Minnich farm, Lititz R3 (near Brubaker's farm machinery shop) the plots will be harvested beginning at 2 p m.

The plots, termed "the most significant corn variety plots in the country", by a Penn State University agronomist, were started over 30 years ago by retired Associate County Agent, Harry S. Sloat, and have been continued uninterrupted over the years.

Tulips and Daffodils

Tulip and daffodil bulbs can be planted any time from now until the ground is frozen, according to Lynn Smith, Penn State extension floriculturist.

Search Begins For Outstanding Young Farmer

The search for this year's Outstanding Young Farmers is beginning this month as thousands of U.S. Junior Chamber of Commerce members begin collecting information on the 1962 accomplishments of the nation's young farmers Local winners will be named early next year to compete for state and national titles in the spring

This year, all farmers between the ages of 21 and 36 located in a Jaycee chapter area participating in the program will be judged Competition is based on farm progress, conservation, and contribution to civic affairs.

More than 1,000 chapters of the U S Junior Chamber of Commerce are expected to participate in the program this year.

Local winners will be recognized in their communities at a Farmer Recognition Program, and honored at their state banquet.

Announcement of the four national winners will be made at a national recognition program in Tulsa next April.

anything to be done about it. And if we (farmers) make a bad mistake in the price of a lot of cattle, we are worse off."

Rishel said he has had little to do with auctions of fat cattle. "I feel we come out a little better when a commission man takes time to deliberate with the ultimate buyer." he said.

Rishel related that he began farming 20 years ago and bought 20 head of choice steers at Lancaster Stock Yards for 15 25 cents a pound. He farms 115 acres on his own farm and rents an additional 100 acres.

The seven farmers at the meeting were in general agreement that the commission men do a good job in the marketing of livestock, but Harold Frey, Marietta R1, said he believes the butcher sometimes is favored by the commission man because the two work closer together than the farmer and the commission man.

Robert Heilbron, president of the Lancaster Livestock Exchange said any commission man worth "any fraction of his salt" will get the best price for cattle that he is able to get.

Nine members of the Livestock exchange were represented.

● Mary Jane Herr

(From Page 1)

from the Lancaster City School District School of Practical Nursing. She hopes to continue training in Physical Therapy.

But it is for her leadership in 4-H recreation that the 19 year old daughter of Mr. and Mrs. Maurice Herr won her trip to the Windy City.

One year the entertainment committee did not have a program for a meeting, Mary Jane relates, and I didn't want to let the club down, so I worked up a pantomime routine And that was the beginning. From there I presented the pantomime at many more 4-H clubs in the county and at state 4-H club week, she says.

But it wasn't really the beginning On her very first trip to 4-H club week at Penn State University, she went as an entertainer playing a clarinet solo for the entire state delegation.

She was a delegate to the county to state 4-H days on three other occasions. Once as an alternate on the poultry judging team and twice as a team member. On the last trip as a poultry judge she doubled as an entertainer presenting her pantomime, "Eloise".

Mary Jane has made two trips to state Club congress as well. She was official delegate from the county and returned the following year in "Club 30", the organization of advanced club members who plan and conduct the congress.

Her leadership ability won a place for her at the State 4-H leadership camp at Camp Kanesatake as a delegate from the county Her fellow club members recognizing her ability have elected Mary Jane to almost every office in her club In the county Beef Club

Cash In on Bonus Bushels with

EXTRA RUGGED P-A-G HYBRIDS

Now get big yield potential PLUS extra crop protection. Here's a combination that actually adds up to more bonus bushels in your bin or crib. These extra bushels are the dividend you get when you plant P-A-G's extra rugged SX or regular line hybrids. You get this extra payoff because P-A-G's bred-in ruggedness helps keep your corn standing throughout the season. In the fall, this superior standability assures you of fast, low-loss picking Next year, harvest bonus bushels on your farm. We'll gladly help you select the P-A-G hybrids that exactly match your growing conditions. See us today.

Ask about P-A-G alfalfa and clover, too.

● Mary Jane Herr

(Continued from Page 6)

she has held the offices of game leader, song leader, and secretary. In the Garden Spot Community club she has served as secretary, song leader, news reporter, and game leader for two years. She has been junior leader and assistant leader in the 4-H sewing club and was president of the foods club. County 4-H Council elected her secretary and junior leader.

But it is not alone in 4-H that Miss Herr exhibits her abilities. She is a member of the Lancaster Junior Musical Arts Society. She was president of her chapter of Future Homemakers at Lampeter-Strasburg High School, a member of the band, and in 1961 she won the school's award for outstanding girl athlete. That year she was co-captain of her school's hockey team.

In the FHA she was elected treasurer of the county association. She was a member of library club for three years and band librarian for two years. She was a member of the junior and senior play casts, in senior chorus for two years and a member of school patrol for three years.

Mary Jane exhibited an interest in her chosen field while still in high school. She was a member of Red Cross club and the Future Nurses of America.

But it is in the 4-H beef club that most of her awards have come. She has won three beef fitting championship trophies and four showmanship trophies at the Lampeter Fair

MY FIRST BIG THRILL IN 4-H is the way Mary Jane Herr describes the emotion she felt on winning reserve championship of the district show and the showmanship trophy in her second year of 4-H club work. Since this picture was taken in 1955 she has won four showmanship trophies and three fitting trophies plus many ribbons and cups for placing her steers at the top of the classes. L. F. Photo.

In 1960 she won both showmanship and fitting at the fair after exhibiting the grand championship steer at the same show. That same year she had high project score in the county club and took her hereford steer on to the state show in Harrisburg There her steer was reserve champion Hereford, and Mary Jane was third in Showmanship — the highest showmanship award ever won by a girl in the state contest

But through it all, Mary Jane recalls the 1955 show, her second steer, when she showed the reserve champion of the district show and carried away the championship ribbon for showing

And even though she is studying hard for her State Nursing Board examinations, Mary Jane still has time to groom and train the five steers she and her father are fattening on Elm Run Farm for the State Livestock Exposition in Harrisburg next week

Of the thirty five Pennsylvania winners in the National 4-H awards, picked from the more than 43,000 members, six each from Adams and Columbia counties, three from York county, two each from Centre, Indiana, and Washington counties, and one each from Beaver, Berks, Butler, Cambria, Crawford, Elk, Fayette, Lancaster, Lawrence, Lehigh, McKean, Somerset, and Wayne counties.

More than 2,300,000 4-H members will be represented by the delegates to the 4-H Congress in Chicago Boys and girls from the 50 states, and Puerto Rico, will register for the annual event In addition to all expense trips honoring state, sectional and national winners, 157 scholarships totaling $65,800 will be awarded in the categories for which Pennsylvania winners were chosen.

MR. POULTRYMAN:

Buy Early Bird Poultry Rations

FOR

Better Results - Lower Costs

HERE ARE A FEW REASONS WHY . . . .

1. **Finest nutritional and research facilities in this area of the Eastern United States.**
2. **Our customers consistently report outstanding records of performance.**

For Example:

Recently we reported the record of a customer who produced 274 eggs per hen housed for one year on 3.9 lbs. of feed per dozen eggs. Several others reported records from 243.5 to 266 eggs per hen housed for a year, all with 4 lbs. feed per dozen or slightly less.

3. **We render REAL SERVICE and are sincerely interested in the SUCCESS of our customers.**

FOR THE FINEST POULTRY SERVICE ANYWHERE contact your Miller & Bushong Service representative or call us direct at Lancaster, 392-2145.

Texture and Color

Consider texture and color when you plan the decorating scheme for your house, advise Penn State extension home management specialists Texture can play tricks, making the same color appear different on different objects. A bright color on a rough-plastered wall doesn't appear so bright as it does on a smooth-plastered one Walls and fabrics that are flat and glossy with little or no texture reflects colors, and this makes colors seem brighter and more intense than they actually are However, a rough surface cuts down reflection, and the texture softens and calms the bright colors.

New Discovery Makes Possible Hybrid Wheat

A discovery heralded as a major breakthough in the development of hybrid wheat was announced this week by the University of Nebraska and the U S Department of Agriculture

A gene or genes that will restore fertility in male-sterile wheat was found in plants growing in nurseries at the University College of Agriculture Although available in corn and grain sorghums, a fertility restorer has been the "missing link" in efforts to produce hybrid wheat

In order to produce hybrid wheat seed, a seedsman must first grow wheat plants with flowers that are male sterile and therefore cannot fertilize themselves Plants with this male sterile characteristic must get pollen from a normal plant in order to produce seed Male sterility can thus serve the same purpose in wheat as detasseling does in the production of hybrid corn seed

But before a farmer can make practical use of the hybrid seed, from male sterile plants, the seedsmen must make another cross with a plant that will restore male fertility Otherwise, farmers' plants would produce no kernels

The male sterility characteristic had earlier been discovered in wheat plants in Japan and at the Fort Hays Branch Station of the Kansas Agricultural Experiment Station But until the recent dis-

Plant Pest Entry Stopped Every 16 Minutes

An inbound pest was stopped at U S ports of entry once every 16 minutes during the 1962 fiscal year, the U S Department of Agriculture reports. These intercepted pests included some of the world's most damaging insects and plant diseases.

A total of 33,033 pests of quarantine significance — foreign insects, mites, snails, nematodes and plant diseases — were found in passenger baggage, ships' stores, mail, and cargo by plant quarantine inspectors of USDA'S Agricultural Research Service during the year that ended June 30

The number of plant pest interceptions was 29 percent higher than the number intercepted during the previous fiscal year and accompanied an overall increase in foreign travel and plant quarantine inspection activities, ARS inspectors add

Khapra beetle, a major pest of stored grain, was intercepted 249 times, compared with 202 in fiscal year 1961. The golden nematode, enemy of tomato and potato crops valued at half a million dollars a year in this country, was intercepted 83 times, compared with 29 the year before. The Mediterranean land snail, a threat to many plants, was discovered 82 times, compared with 64 times last year.

Three dangerous citrus diseases not found in this country but known to be potential enemies of U S. citrus crops, valued at more than $550 million a year, were intercepted 949 times. These diseases were citrus canker, 271 interceptions black spot of citrus, 464 interceptions, and sweet orange scab, 213 interceptions.

Traffic across the Mexican border continued to increase, as it has each season during the past 15 years. More than 24,700,000 cars and trucks entered the United States from Mexico — half a million more than entered during 1961 In addition, recent improvements in the Pan American Highway are now bringing travelers overland from tropical areas of Central America, where several damaging plant pests — including the destructive Mediterranean fruit fly — are known to exist.

Most of the plant pests and unauthorized plant material arrived in passenger baggage. ARS inspectors, cooperating with U S. Bureau of Customs inspectors, examined 23½ million pieces of baggage during 1962 — an increase of about one million pieces over the previous fiscal year. The number of ship and air passengers whose baggage received inspection was up about 200,000 — from approximately 5,500,000 in 1961 to slightly more than 5,700,000 in 1962

Other inspection activities also showed an increase. ARS inspectors, in cooperation with postal authorities, examined nearly 40 million incoming packages, compared with fewer than 38 million inspected last year The number of air cargo packages inspected rose from about 660,000 in 1961 to about 850,000 in fiscal year 1962.

● Hybrid Wheat

(Continued From Page 8)

covery the fertility restorer in wheat had never been identified The clue that both male sterility and the fertility restorer might be present in wheat in a Nebraska nursery came when some plants in an experimental line were found to be fertile while others were sterile.

Even though all the genetic tools now appear to be available for hybrid wheat, the agronomists will not predict how soon it may take its place on the Nation's farms along with hybrid corn and hybrid sorghums

Male sterility and the fertility restorer must first be transferred into existing varieties of wheat — or into new varieties adapted for farm use Then exhaustive tests must be made before these varieties can be recommended to growers

Agronomists also decline to predict how much increase in yields may be forthcoming with hybrid wheat. They believe the increase may be substantial, however, and they have some experimental evidence to support their opinion.

No seed of the new hybrids is available from the Department of Agriculture or the University of Nebraska.

Growing Chicks

As chicks grow, they develop a protective covering of flesh and feather, explains F. H Leuschner, extension poultry specialist at Penn State. Their heat requirements are not as great though the weather may be turning colder.

PUBLIC AUCTION

Monday, October 29, 1962

At 11:00 A.M.

Sale of Work Horses & Mules

ALSO RIDING AND DRIVING HORSES
JOB STOLTZFUS will have one load of Riding and Driving Horses.

At 2:00 P.M. — SALE OF FAT HOGS AND CALVES

Annual Dairy Cow SHOW and SALE

Wednesday, October 31, 1962

$300 – IN PRIZES – $300

$100. to be given to buyer of Grand Champion of show.

$50.00 to be given to exhibitor of Grand Champion.

All animals to be entered in the show must be on the premises not later than 7:00 p.m., Tuesday, October 30.

Cows entered in show will be judged at 10:00 a.m. on day of sale. Show cows will be sold at 2:00 p.m. Sale will start at 12 Noon instead of the usual 12:30 p.m.

We expect to have very large consignment of outstanding cows for this sale. Many of these cows are Pure Bred with very good milk and butter fat records. Our shippers have made a special effort to buy nothing but the best to enter in our dairy show and sale.

For this week we will have 60 HEAD OF OUTSTANDING WISCONSIN COWS; 25 HEAD OF CANADIAN PURE BRED HOLSTEINS; 35 HEAD OF SUSQUEHANNA COUNTY COWS and 25 HEAD OF FRANKLIN COUNTY COWS.

If you are in need of some real producing cows do not miss this sale. This is a buyers opportunity.

HEAVES DON'T BOTHER ME

When I eat New Hope Complete Horse Feed

No other feed compares with New Hope for effective relief of heaves and allergic conditions.

In use for over five years, it has helped to restore hundreds of horses — even those that had been given up for lost — to sound, healthy condition. New Hope Complete Horse Feed gives you all-in-one feeding that is simple and easy. No need for tiresome soaking of beet pulp, no need to feed hay because this complete feed has everything for the horse's nutritional requirements.

Grange Master Calls For Better Business Climate

State Grange Master, J. Collins MsSparran called for a four point program for attracting more industrial growth to Pennsylvania at the annual meeting of the farmer organization this week in Reading

McSparran urged the 2,000 delegates to take positive action to improve what he called Pennsylvania's declining economic position "Every job created gives Farmers a broader potential market for their products", he said

He asked delegates to work for "1 an improved tax climate 2 the curbing of power held by some irresponsible labor leaders 3, the curing of undue harrassment of industry by agencies of the state, and 4 the curing of our rapidly growing state indebtedness '

Turning to education McSparran once again urged the repeal of act 561 the school district reorganization act He also conceded that amendment of Act 561 is a possible solution to the controversy but added "This is a long torturous path and one that cannot but end in some kind of compromise situation"

Turning to agriculture McSparran reported that The Grange was responsible for a joint meeting of the three major purchasing co-operatives to institute a joint course of action to alleviate the tight supply of feed due to the drought and to help stable prices at a more realistic level He also called for continual pressure for the establishment of roadside markets along interstate highways and the Pennsylvania Turnpike

---

There are more jerseys officially classified for breed type than any other breed

3 County Boys To Compete In Calf Scramble

HARRISBURG — Homework in captured and haltering "wild" young steers was prescribed today for 62 Pennsylvania farm boys preliminary to the Pennsylvania Livestock Exposition, Nov 5-9; where they will compete in calf scrambles for five $100 purebred feeder calves

Lancaster County entries are John Campbell, New Holland, Kenneth Weaver, Quarryville RD 2, and Robert Hosler, Manheim, RD 4

The scrambles, with about a fifth of the boys in each, will be held the first four nights and last afternoon of the show The first boy in each contest to halter a calf and bring it to the center of the arena will get a 400-pound Angus feeder steer from the Pennsylvania Angus Association

Other young steers from Lancaster Stock Yards, and all unbroken to the halter, will be used in the contest Tom King contest chairman has cautioned that these animals may be "plenty wild and has advised the boys to practice haltering on young feeder steers running at large at home

---

Underpressing Needed

Press as you sew and your finished garment will need only a light top pressing reminds Mrs Mae Barton, Penn State extension clothing specialist Top pressing is much like any pressing you do Press on the right side only, using a press cloth on fabrics that may need it Pressing as you sew is often referred to as underpressing

---

Florida extends 451 miles north and south, and 412 miles west to east at the widest spot

Corn Buyers Can Save Money By Shopping

Pennsylvania livestock feeders and grain handlers can save money in buying corn by checking various sources of supply and methods of transportation, a recent survey indicates.

The survey showed that corn prices vary as much as 20 cents per bushel from one county to the next, with 5 and 10 cents differences common The study was made by Clarence E Trotter and associates, marketing researchers with the Agricultural Experiment Station, the Pennsylvania State University. Over 1000 feed handlers in the State were queried.

Truck shipment costs averaged about 5 cents less per bushel than hauling by railroad, it was found. This held true for total shipments and for areas of the State — but not in every county.

The survey showed that corn harvested in Pennsylvania is frequently sold off the farm or out of an area Later in the season feed supplies are important. This causes considerable variation in prices, Dr. Trotter points out.

About two-thirds of the corn shipments came from Ohio and Indiana Nearly all of the shipments into Erie, Crawford, Beaver, and Lancaster counties originated in Ohio State of Indiana shipments went to Mercer, Bedford, Butler, and Cambria counties.

New York State accounted for 24 per cent of the shipments and was almost the sole supplier reported for the northern-tier counties. Nearly halt of these shipments originated in Buffalo — apparently corn received by water transportation from other states.

Either Baled or Wafered

Dairy cows like their hay either baled or wafered and it makes little difference which, says B S. Horne, Penn State agricultural engineering extension specialist This was one conclusion from a study made at a midwestern university.

WINNERS OF THE 4-H ENTOMOLOGY CLUB show off their displays of insects. Stephen Rannels, Lititz, left, collected and mounted six cases of adult insects and one display of larval insects to earn top spot in the roundup. Miss Joan Shaub, Quarryville R1, was top winner in the first year competition.

L F. Photo.

Stephen Rannels Wins Third Entomology Club Championship

Stephen Rannels, who would like to make entomology his life's work, won his third first place award in the county 4-H entomology club roundup last Saturday.

The 13 year old son of Mr and Mrs. Donald Rannels, 123 S Spruce Street, Lititz scored 98 points out of a possible 100 in his project book work and exhibited six cases of insects and a display of insect larvae to capture the top award for both score and exhibit.

Last year, in his third year project, Stephen missed the grand prize by a close margin to David Wenger He received top honors for his first year project in 1959 and for his second year project in 1960.

The second place award went to Miss Joan Shaub, the 11 Mrs Ernest Shaub, Quarryville year old daughter of Mr and R1 Miss Shaub in the entomology club for the first year, scored an 85 in her project book. She had a sewing project last year and has sewing and cooking projects this year in addition to her entomology project She is a member of the New Providence Community Club

Top scorer in the second year project was Miss Linda Porter, daughter of Mr. and Mrs Edgar Porter, Washington Boro R1. Second place for first year work was won by Miss Barbara Rorabaugh, daughter of Mr and Mrs. John Rorabaugh, Millersville.

Judge was Arnold Lueck, Assistant County Agent.

Fall Fishing

Often the best catches are made in the fall There's no closed season on bass or blue gill fishing in farm ponds. New regulations permit the resident owner, his family, his employees and his tenants to fish for bass and bluegills the year-round, according to Bob Wingard, Penn State wildlife extension specialist.

During the 33 centuries of recorded history, Jerusalem has been besieged 24 times.

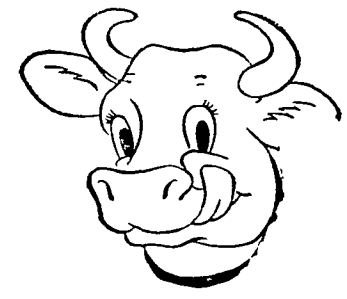
SAVE HALF ON YOUR ROUGHAGE NEEDS with WAYNE SWEET BULKY

A palatable, nutritious Rumen Conditioner

Extending your supply of roughage the Wayne Sweet Bulky way will help cows adjust to lower levels of roughage —



With 5 Pounds of Sweet Bulky You Feed 15 Pounds Less Hay

Here's How:

1. Cut back on hay to a minimum of 10 to 15 lbs. daily (or 5 lbs. of hay if silage is also fed)
2. Feed 5 lbs. of Sweet Bulky daily
3. Until cows are past peak production, feed 2½ lbs. Grain Mix for each 100 lbs. bodyweight. Continue 5 lbs. of Sweet Bulky daily.
4. After peak production, adjust Grain Mix to 1 lb. for each 2 to 2½ lbs. milk. Continue 5 lbs. Sweet Bulky daily.

Our Breakfast Heritage

By Mrs. Richard C. Spence

Our early settlers knew well that breakfast was important to maintain an energy that was devoted to a morning of wood chopping, corn planting, cotton picking or gold digging. So from East, West, South and North came traditional breakfast menus, menus sparked with regional flavor that helped make breakfast a favorite meal.

Today we know even more about the importance of breakfast. We know that a morning of classwork, study hall or gym class still requires energy, especially mental alertness. Nutritionists tell us that breakfast should supply at least ¼ of our daily protein and calorie needs. It has been shown that young people who eat a good breakfast are more alert and accomplish more. Their physical fitness zooms upward.

Even though their fitness could be improved, good looks and figure and a clear skin would be noticeable, an attractive personality and plenty of pep would be assured, half of our nation's teenagers skimp on breakfast or even skip this important meal.

Two main reasons are given for not eating breakfast. First, weight consciousness. True, a trim figure does depend largely on calories. But breakfast is seldom the calorie culprit. More often it is the snack eaten to ward off midmorning "starvation." Another oft' heard reason — the "same old thing" for breakfast every morning doesn't provide much motivation for bounding out of bed. So it is the homemakers job to make the first meal of the day as interesting and attractive as possible. Here are some suggestions that might help to make that job easier for you.

OATMEAL WITH MAPLE SYRUP

2 cups oatmeal (quick or old-fashioned, uncooked)
1 teaspoon salt
4 cups water

Stir oats in briskly boiling, salted water. Cook 1 minute for quick oats (5 minutes or longer for old-fashioned oats). Stir occasionally. Cover pan, remove from heat and let stand a few minutes. Serve with maple-blended syrup and milk or cream. Makes 4 to 6 servings.

MENU SUGGESTION: Baked apple, Oatmeal with maple syrup, Blueberry muffins, milk.

* * * *

CRISP JOHNNY CAKES

1 cup enriched corn meal
½ cup sifted all-purpose flour
1 tablespoon sugar
1 teaspoon salt
1 teaspoon baking powder
1 egg, beaten
1 cup milk

Heat griddle to hot (400 degrees). Sift together dry ingredients into bowl. Add egg and milk; mix well. Pour ¼ cup batter for each cake onto greased, preheated griddle. Bake until edges are dry and top is covered with bubbles, about 4 minutes. Turn, bake second side about 4 minutes. Serve warm with butter and maple-blended syrup. Makes 8 cakes.

MENU SUGGESTION: Apricot nectar, Crisp Johnny cakes, Sausage links, milk.

* * * *

CINNAMON STICKY BUNS

DOUGH

1 cake compressed or 1 package dry yeast
¼ cup lukewarm water
1¼ cups milk, scalded
¼ cup sugar
2 teaspoons salt
½ cup shortening
2 eggs, beaten
4½ to 5 cups flour
1¼ cups rolled oats (quick or old-fashioned, uncooked)

FILLING

½ cup firmly-packed brown sugar
2 teaspoons cinnamon
½ cup chopped walnuts

Soften yeast in lukewarm water. (Use warm water for dry yeast.) Pour scalded milk over sugar, salt and shortening. Cool to lukewarm. Stir in eggs and 1 cup flour. Add softened yeast and oats. Stir in enough more flour to make a soft dough. Turn dough out on lightly floured board or canvas, knead until smooth and satiny, about 10 minutes. Round dough into ball; place in greased bowl; brush lightly with melted shortening. Cover and let rise in warm place until nearly double in size, about 1 hour. Combine all ingredients for filling; set aside.

Punch dough down; cover; let rest 10 minutes. Grease two 9-inch square pans; pour ⅛ cup light corn syrup into each. Divide dough in half. Roll out half of dought to form an 8x18-inch rectangle. Spread with 2 tablespoons softened butter. Sprinkle with half of filling. Roll up lengthwise as for jelly roll. Cut in 1½-inch slices; arrange in one of prepared

pans. Repeat with other half of dough.

Brush lightly with melted shortening. Cover; let rise until nearly double in size, about 45 minutes. Bake in a preheated moderate oven (350 degrees) about 45 minutes. Turn out of pan immediately. Makes 2 dozen buns.

* * * *

STREUSEL COFFEE CAKE

1 10½-ounce package coffee cake mix
1 egg, unbeaten
½ cup milk
¼ cup chopped nutmeats

Add egg and milk to coffee cake mix Pour batter into pan. Combine topping mix with nutmeats. Sprinkle evenly over batter. Bake in preheated oven (375 degrees) about 25 minutes. Makes 8 servings.

* * * *

SCONES

3 tablespoons sugar
2¾ cups pancake mix
⅓ cup shortening
2 eggs, beaten
⅓ cup milk

Heat oven to hot (425 degrees). Add sugar to pancake mix. Cut in shortening until mixture resembles coarse crumbs. Add eggs and milk, mixing lightly until dough can be formed in a ball. (If necessary, add a little more milk to make a soft dough). Knead gently a few seconds on lightly floured board or canvas. Divide dough in half.

Roll half of dough to form a 6-inch circle. Cut into 6 wedge-shaped pieces. Repeat with second half of dough. Place on greased cooky sheet. Brush tops with melted butter. Sprinkle with sugar. Bake in preheated oven 12 to 15 minutes. Serve hot. Makes 12 scones.

* * * *

CEREAL SUNDAE

3 cups water
¼ teaspoon salt
½ cup cream of wheat (quick)
1 8½-ounce can crushed pineapple, drained
¼ teaspoon mace
1 pint strawberry ice cream

Bring water and salt to rapid boil. Slowly sprinkle in cream of wheat, stirring constantly while mixture thickens Lower heat and continue

For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Storing Summer Clothing

THURSTON

Take stock of your dresses for needed repairs. Mend broken seams or hems and sew on loose buttons before washing or drycleaning garments. When you do this, garments will be ready for the next season

Wash washable dresses Be sure they are free of starch, and dry so they won't mildew during storage.

Store cottons folded flat in drawers or large storage boxes. Since they are not starched, you won't need to iron them before packing.

Have nonwashable clothing drycleaned, then hang in garment bags You may drape heavy skirts over an extra hanger to relieve strain on shoulders and waistline. Hang belts separately as their weight can pull heavily on dress fabrics.

Take moth preventive measures with summer clothing and bathing suits that contain wool

To discourage mildew, store summer wear in an area that is dry and not too warm.

To Maintain Egg Quality

Keep eggs clean, covered, and

cooking 5 minutes more, stirring occasionally. Stir in crushed pineapple and mace. Spoon into cereal dishes and top with a scoop of strawberry ice cream. Makes about 4 servings. Good served with date bread.

* * * *

WHEAT GRIDDLE CAKES

- 2 cups sifted flour
- 3 teaspoons baking powder
- 2 teaspoons sugar
- 1 teaspoon salt
- ¼ cup shortening
- 3 shredded wheat biscuits, finely crumbled
- 2 eggs, beaten
- 2 cups milk

Sift flour, baking powder, sugar and salt together. Cut in shortening until fine as meal. Add crumbled shredded wheat biscuits. Combine eggs and milk. Pour over dry ingredients and mix only until blended. Let stand 5 minutes. Drop ¼ cup batter on lightly greased hot griddle. When cakes puff and bubble turn and brown on other side. Makes 12 to 14 griddle cakes. Serve with cheese-topped sausage patties.

Cut 1-pound package of frozen sausage meat, partially thawed, into 6 to 8 slices. Place slices in a frying pan over low heat. Fry 12 to 15 minutes, turning frequently. Before removing from pan top with a sprinkling of grated American cheese.

* * * *

BLUE OX BURGERS

- ½ pound bulk pork sausage
- ½ pound ground beef
- ¼ teaspoon salt
- ¼ teaspoon sage
- ¾ cup rolled oats (quick or old-fashioned)
- 1 egg
- 2 tablespoons milk

Combine all ingredients; mix lightly. Shape into 6 patties. Place in frying pan; add ⅓ cup water. Cover and cook 5 minutes Pour off drippings, pan-fry slowly at least 15 minutes on each side. Makes 6 patties.

* * * *

BUCKWHEAT LOGS

- 2 cups milk
- 2 eggs
- 2 tablespoons melted or liquid shortening
- 2 cups buckwheat pancake mix

Cinnamon Butter Topping: Combine ½ cup butter, soft, ⅛ teaspoon cinnamon and 2 tablespoons sugar. Set aside.

Place milk, eggs and shortening in mixing bowl. (If melted shortening is used, add after buckwheat mix). Add mix; stir lightly with wire whisk or spoon until batter is fairly smooth. Slightly lumpy batter makes light pancakes For each pancake, pour ¼ cup batter onto hot, lightly greased griddle Bake to golden brown, turning only once. Roll up to resemble logs. Spread with Cinnamon Topping. Serve with warm syrup. Makes 14 to 16 pancakes.

* * * *

HONEY CURRANT UPSIDE-DOWN MUFFINS

- 2 cups all-bran cereal
- ¾ cup honey
- 1¼ cups milk
- 1 egg, slightly beaten
- 1 cup sifted flour
- 1 teaspoon baking soda
- ½ teaspoon salt
- ½ cup currants

Combine cereal, ½ cup of the honey and milk, let stand until most of moisture is taken up Stir in eggs Sift together flour, soda and salt. Add to first mixture, stirring only until combined. Put 1 teaspoon of remaining honey into bottom of each greased muffin cup; sprinkle with about 1 teaspoon currants. Fill about ⅔ full with batter. Bake in moderately hot oven (400 degrees) about 25 minutes. Let stand about 5 minutes before removing from pans. Serve immediately, currant side up. Makes 12-15 muffins, 2-¼ inches in diameter.

* * *

APPLESAUCE SQUARE

- 1-¾ cups sifted cake flour
- 1 teaspoon baking soda
- ½ teaspoon salt
- 1 cup sugar
- ½ teaspoon cloves
- ½ teaspoon allspice
- 1 teaspoon cinnamon
- ½ cup shortening
- 1 cup sweetened applesauce
- 1 egg
- ½ cup chopped raisins
- ½ cup chopped nuts

Sift flour, baking soda, salt, sugar and spices into a large bowl. Add shortening and applesauce. Mix to dampen flour, then beat 2 minutes. With electric mixer use low to medium speed. Add remaining ingredients and beat 1 minute. Pour batter into greased 8-inch square pan lined with paper. Bake in a moderate oven 375 degrees about 50 minutes. Let stand about 10 minutes; then remove from pan and cool, Frost with Fluffy Frosting.

Corn Picking Time ?

Take Advantage of Our Grain Bank and Grain Storage Program For Your Corn Harvest

● SPECIAL BENEFITS OF OUR GRAIN BANK PROGRAM

All grains stored under this program can be returned to the grower in any form of poultry or livestock feed, by using one of the various concentrate programs. There is **no** livestock or poultry feed that this concentrate and grain program does not cover.

There will be storage available for corn, which can be picked and shelled at harvest time, brought to the mill, dried and stored here for later use.

Faster service now available due to new bulk unloading system. Information available on custom work with new picker-sheller machines.

Every year more and more customers use the Grain Bank and find it the easiest and most economical way to handle their local grown corn.

Grasslands FFA Attend Nat'l Convention

By: Robert Herr, Advisor

Six members of the Grassland FFA Chapter of the Garden Spot High School attended the 35th National Convention of the Future Farmers of America held in Kansas City, Mo on October 10th, 11th, and 12th.

They attended the convention as representatives of their FFA Chapter and the New Holland Machine Company which used its company plane to transport the group to the convention. Attending were Larry Weaver, Wilmer Martin, Richard Martin, Carl Gehman, Sanford Fritz, and Donald Zimmerman, all Seniors in Vocational Agriculture along with their FFA Advisor, Robert Herr, and Homer Luttringer, Head of Public Relations for the New Holland Machine Company.

The local chapter members were part of over 10,000 FFA boys from all 50 states of the U S representing more than 388,000 FFA members. The group attended all the sessions of the Convention which included business of the National FFA, an FFA Talent Show, the awarding of the highest FFA Degree — The American Farmer Degree — to 382 farm boys, heard the finalists in the public speaking contest, witnessed the honoring of men in all segments of Agri-business for their help in the Vo-Ag Program, and the climax of the program, the naming of the Star Farmer of America.

In addition to the convention, the boys attended the American Royal Livestock Show, visited the Kansas City Stock Yards, toured the American Hereford Association headquarters, visited the Truman Library at Independence and had the unexpected thrill of hearing Harry S. Truman address the FFA members and the opportunity to take pictures of this ex-president.

Fire Safety While Hunting Is Urgent Need

and Waters Secretary Maurice K. Goddard today directed a special appeal to Pennsylvania's hunters to do their share in preventing forest fires during hunting season.

"Fall hunting season corresponds with one of the two worst fire seasons of the year," Goddard explained, "and unfortunately, most of the fires this time of the year are caused by hunters."

Goddard said that the 1962 spring fire season was one of the worst in many years because of an unbelievable combination of sustained high winds and low humidity in most sections of the Commonwealth.

"It is unlikely that such severe conditions will be repeated this fall," he stated, "but the weather factor is completely unpredictable." "We can avoid serious forest fires," he warned, "if every Pennsylvanian makes up his mind to exercise extreme caution when in the woods and forests."

Goddard said that he hoped that every man, woman, and child in the Commonwealth would lend their cooperation to the Department of Forests and Waters in preventing forest fires during the remainder of 1962. "Our present goal," he stated, "is to keep the total number of fires this year under the most recent yearly high established in 1952. During that year there were 1653 forest fires in Pennsylvania. Thus far in 1962 there have been approximately 1500 fires.

LANCASTER COUNTY'S CHAMPION 4-H Tractor operator will compete in the eastern district finals today at Schuylkill Haven. Shown here after his Lancaster County win is Kenneth Shertzer, son of Mr. and Mrs. Melvin Shertzer, Millersville R1. Kenneth was a first-year member in the Lancaster County 4-H tractor maintenance club last winter. In the event he wins today, he will represent the eastern district 4-H at the state contest in Harrisburg in January.

cool.

Buy eggs only from a dealer who keeps them refrigerated, and get eggs into the refrigerator as soon as possible after you buy them.

Store eggs in a covered container to keep moisture in and odors out.

Eggs lose quality quickly when left at room temperature.

What To Do About Colds

Be alert to these signals — sniffles, sneezes, coughing, sore throat, aching muscles running eyes, and fever.

Take care of yourself at once when you get a cold. Avoid quick changes in temperature and stay in bed if possible. Eat well-balanced meals and avoid overeating. Drink plenty of liquids to tone up your system and help elimination. Call your physician if cold symptoms persist.

Keep your cold to yourself. Be thoughtful of others — colds are catching. Cover your mouth when coughing or sneezing. Use disposable tissues and dispose of them promptly Avoid direct contact with other persons.

Guard against the next cold after you recover. Build up your resistance by keeping physically fit with good food, exercise, adequate rest and sleep. Use common sense and avoid extreme temperatures, fatigue and contact with persons who have a cold.

This An' That

High moisture prunes have taken the place of yesterday's hard dried ones. Processed by a new method, prunes are now plump, meaty, tender, and moist. They add a natural tart-sweetness and a fruity-richness to a variety of dishes. Prunes are rich in iron and vitamin A and contribute other essential minerals and vitamins to the diet. One pound of prunes will make about eight servings.

You can sort children's socks quickly after laundering if you pin pairs together with a safety pin before washing.

Save those extra slices of bread and use for creamy bread puddings. Or dry the slices and grind or roll into crumbs, then store in tightly covered containers and use to casserole dishes.

Mow Lawns

Mow lawns and other turfgrass area through the fall and until growth ceases due to cold weather, suggests Jack Harper, extension agronomist at Penn State.

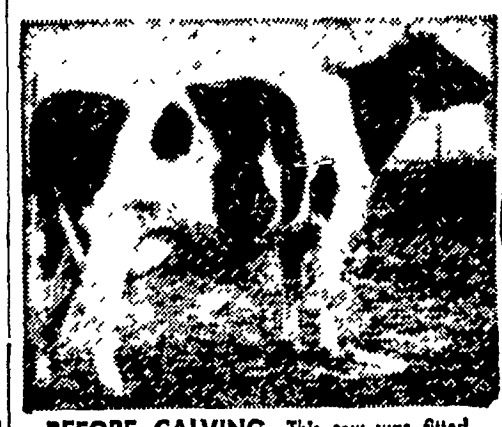
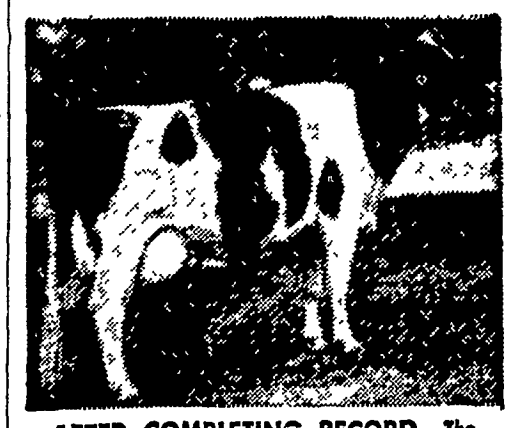
COWS PROPERLY CONDITIONED ...during the dry period PRODUCE UP TO 25% MORE MILK!



BEFORE CALVING This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.



AFTER COMPLETING RECORD The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to 25%* more milk!

See us today for full particulars.

PIONEER

Joseph M. Good & Sons

BEST FOOD BUYS
Hallowe'en Shoppers Specials

Shopping lists this week-end will include a variety of goodies designed to please the "trick or treat" Halloween visitors Promotionally inclined retailers will cater to this demand, observes Tom Piper, Penn State Extension Marketing Agent Watch for special displays and economical prices on candy and cookies

Apples are always popular with the ghosts and goblins who come to call on Halloween Harvesting is nearing an end and supplies of all late season varieties are plentiful Red Delicious, Stayman, Golden Delicious and McIntosh are popular varieties for eating out of hand Pumpkins, Indian corn and decorative gourds are in plentiful supply and almost a must for party decorating. Sweet apple cider is likewise plentiful and an economical treat.

The first estimate of the new Florida orange crop is about six million boxes more than last year with most of the increase expected on the early and mid-season varieties

Other good fruit buys include cranberries, grapes and frozen orange juice.

Fresh produce counters are well supplied but with relatively little change in price from last week. Best values remain in the hardy fall items such as potatoes, cabbage, cauliflower, broccoli, Brussel sprouts, turnips, rutabagas, squash and sweet potatoes.

Small eggs hold the key to egg economy in the Fall. The new pullets just beginning to lay will not produce large eggs for some time. Since they are replacing older hens in the laying flock, volume of small size eggs increase and generally cost less per pound to consumers.

Pork makes its debut at the top of the list of good meat values this week With the spring pig crop coming to market in increased volume, prices have tumbled at all market levels. Better buys will include fresh pork shoulder, bacon, and loin roasts Hams are plentiful but will move higher in price as we approach the holiday season Chicken and turkey are economically priced Good buys in beef will be limited to those items selected for special promotion

Farmers See Demonstration Of New Mangers

More than fifty dairymen and farmers from various sections of Pennsylvania witnessed a demonstration of the installation of a new type precast concrete manger at Hershey Estates Farm No. 52, Elizabethtown Road, on Monday afternoon. Dairy specialists from Pennsylvania State University, county farm agents and representatives of the Portland Cement Association were also present.

Manger units were precast at the Denver Plant of Kurtz Precast Corporation. These stock sizes, 4', 4' 6" and 5' were used. It was pointed out that these dimensions were recommended by state dairy specialists The concrete was specially formulated to resist barnyard acids and is of the same high quality as that used in large structural members. Factory production assures consistent quality and proper curing conditions.

Manger units to accomodate ten cows were placed in a little over one hour. Last week, in the same barn, units to accommodate eleven cows were placed in one hour and ten minutes As the units were placed, stanchion equipment and water lines were positioned and ready for use in a short time

During the demonstration, state dairy specialists pointed out that the new precast manger units not only permit fast installation, but also make it possible to remove and relocate the mangers in the event of future structural changes to the barn.

Original manger equipment in the demonstration barn was of wood, designed to accomodate twenty-eight cows Acting upon recommendations of the state dairy specialists, Hershey Farms management converted to precast concrete mangers to accommodate twenty-one cows A representative of Hershey Estates stated that with improved conditions, it was expected that the rate of milk production would increase.

FREE!
all-purpose
Scoop

$1.89 Retail Value

This handy all-purpose scoop has dozens of uses. Made of high quality polyethylene that will not break or crack.

TO GET YOUR FREE SCOOP save 8 coupons from Red Rose Milk Replacer (complete nutrition for the young calf), Red Rose Dog and Puppy Food (the food of condition and vigor), Red Rose Equinader (NEW--high performance horse feed), and Red Rose Rumenator (high quality booster feed for dairy and beef animals). *Complete instructions for receiving your scoop are on the coupon.*

County Agent Says Spray Now To Control 1963 Alfalfa Pests

The most practical approach to the control of alfalfa weevils and spittlebugs on 1963 alfalfa crops is by the fall application of an insecticide in 1962, Robert Powers, Chester County agent said this week.

There are now two materials approved for this purpose, dieldrin OR heptachlor.

Either materials will provide control of alfalfa weevils. Both will control spittlebugs, but dieldrin gives better control. Neither material will affect aphids or leathoppers, he said.

For satisfactory control, sprays should be applied using at least 20 gallons of water per acre. Granules, either alone or mixed with fertilizer, should be 2% or 2½% formulation but not higher. SPRAY application is the preferred method.

Use ONE insecticide either Dieldrin or Heptachlor. Powers cautions, and in the following amounts:

DIELDRIN — 1 pound actual per acre — Apply not later than November 30, 1962.

Dieldrin SPRAY — use 2 gallon or about 3 quarts of 1.5 pounds 1 gal. emulsion or 2 pounds of 50% dieldrin wettable powder per acre.

Dieldrin GRANULES — either alone or mixed with fertilizer — 40 pounds of 2½% or 50 pounds of 2% granules per acre.

HEPTACHLOR — 1 pound actual per acre — Apply not later than November 15, 1962. Heptachlor SPRAY — use 2 quarts of 2E emulsion per acre.

Heptachlor GRANULES — either alone or mixed with fertilizer — 40 pounds of 2½% or 50 pounds of 2% granules per acre.

After dieldrin or heptachlor is applied, the fields should not be grazed or harvested until the normal time for cutting first crop forage in 1963. Neither dieldrin nor heptachlor can be applied in the spring without danger of a residue on the forage, he further cautioned.

CHICKWEED CONTROL

Chloro IPC can be applied alone or in combination with insecticide for weevils.

Temperature should be 50° F or colder and remain that way for several days. Use at rate of 1 quart (1 lb. active ingredient) per acre in at least 20 gallons of water. Heavier rates will be very destructive to grasses, especially in August seedings.

Water Soluble Dinitro can be used for chicken control during early fall. Temperature should be 55°F or warmer when material is applied. Dinitro will not damage grass. Use at rate of 3 to 4 pints in 20 to 40 gallons water per acre. Repeated applications will likely be required, he said.

Keep Apple Quality

Harvesting apples at the right stage of maturity does more to lengthen their storage life and prevent scale than artificial aids, says Carl S. Bittner, Penn State extension pomologist. Quality and appearance are also influenced by color of fruit, condition of trees and kinds of containers used for storage.

Vaccinate all hogs for cholera; there is no known cure for infected animals.

Changes in Cereal Family

Some changes have taken place within the cereal family during recent years, says Harold Neigh, Penn State extension specialist in consumer economics. Ready - to - serve cereals are becoming more and more popular. In 1947, they accounted for about half of all the cereal eaten. Today, almost two-thirds of the total amount of cereals used is served right from the box. Many of the ready-to-serve cereals are made of corn, and rolled oats is the favorite among hot cereals.

"The hand that rocks the cradle" now charges more per hour than Grandpa earned per day.

Livestock Show Will Feature State's Best

HARRISBURG — More than 500 breeders from 23 states — Maine to Mississippi and Texas to Iowa — today had entered a total of 3,126 beef cattle, swine and sheep for the sixth annual Pennsylvania Livestock Exposition Nov. 5-9 in the Pennsylvania Farm Show Building, Harrisburg.

Ben Morgan, general superintendent, said the list of exhibitors includes many of the top breeders in the Mid-West and the East.

Swine entries total 1,264, a new high for the exposition. They are up from 1,225 in 1961. The beef cattle show of 776 head, up from 739 last year, will be the second largest for the exposition. Only sheep showed a drop at 1,086 head as compared to 1,192 a year ago. The 3,126 total animals for all departments compares to 3,165 last year.

Dr. William L. Henning, Pennsylvania Secretary of Agriculture, said the "continued and consistent participation of breeders is evidence that the exposition is filling a need. Wide distribution of entries from most of the eastern half of the nation reflects increasing interest in livestock in this important producing and marketing area."

The exposition is sponsored by the Pennsylvania Department of Agriculture, its Farm Show Commission and the Pennsylvania Livestock and Allied Industries Association.

Evening entertainment will feature indoor polo, parades of champion livestock, calf scrambles and riding demonstrations by 200 farm youths in 4-H light horse and pony clubs. During the livestock parades, spectators will see also official judging of beef breeder groups. The entire event and parking are free. Cash premiums total nearly $80,000.

D. H. Van Pelt [Dairy Specialist]

Writes An Open Letter To ALL DAIRYMEN Concerning The Roughage Shortage This Coming Fall and Winter.

October 17, 1962

Dear Mr. Dairyman:

Hot weather and drought have given you a short crop of hay — not enough to carry on as has been the practice in the past when hay was plentiful, and relatively cheap.

I suggest that you do not buy hay or hay replacers, but I do suggest that you plan your entire feeding program to make the greatest use of the hay and silage you have.

Research and practice indicate that a cow will produce well on a minimum of 5 pounds hay per day per cow. Your present supply should allow you to feed 8 to 10 pounds per day per cow.

Research and practice have also proven a cow will handle effectively more silage and produce well on it. To replace the cut in hay I suggest you increase your daily feeding of silage by 10 to 12 pounds.

To round out your program and bring the nutrition level into balance, I also suggest you increase your grain ration. If feeding on a ratio of 1 pound grain to 3½ pounds of milk, change to a ratio of 1 pound grain to 3 pounds of milk. If ratio is 1 pound grain to 2½ pounds of milk, change your ratio to 1 pound grain to 2 pounds milk.

This program will extend your hay and produce milk at your desired level while maintaining the cows health and your profit.

We are in position to supply you with an exceptional hay extended (replacer) if that is your desire, but we strongly recommend the program outlined above in preference to hay replacers.

Your interests are our interests and we want to see you make the greatest returns on your investment. We sincerely feel the above program and HORNCO UNI-PEL Dairy Feeds, which are fortified heavily with extra vitamins and minerals, will give you the best possible results and profits this coming year.

Sincerely,
D. H. Van Pelt
